

Billing Evidence

Commit: `0f0280d9d8b8ca95f539b09b41f6e960a1b0b42e` **Stripe UAT:** executed

Demonstrated flows

Flow	Status	Evidence
------	--------	----------

|-----|-----|-----|

Hosted Checkout Session	PASS	stripe-uat-smoke step 6; video 14
Subscription active (Premium)	PASS	sub id in raw/stripe-uat-smoke.txt
Webhook credit grant	PASS	checkout.session.completed → wallet/plan
Credit pack charge	PASS	payment_intent succeeded
RFQ debit (-25)	PASS	BILL-01; stripe smoke step 5
Refund	PASS	BILL-03; stripe smoke
Ledger reconcile (isolated)	PASS	BILL-04 balance=ledgerSum
Ledger reconcile (prod demo wallet)	WARN	pre-existing drift -250; session net OK

Stripe smoke excerpt

See `raw/stripe-uat-smoke.txt`.

Honest caveat

Production UAT wallet showed `balanced: false` with delta -250 from prior activity. This does **not** reopen the original “price sheet only” P0; it is tracked as a Medium hygiene item for wallet reset/reconcile before final payment sign-off if Robin requires a perfectly balanced long-lived demo wallet.
